Effective fragrance odour control

All Oxy-Gen Powered® fragrance cartridges contain **neutra-lox**, our proprietary odour eliminating ingredient that is extremely effective against the smell of urine, faeces, body odour, tobacco, pet malodour, kitchen odour, mould, mildew and more.

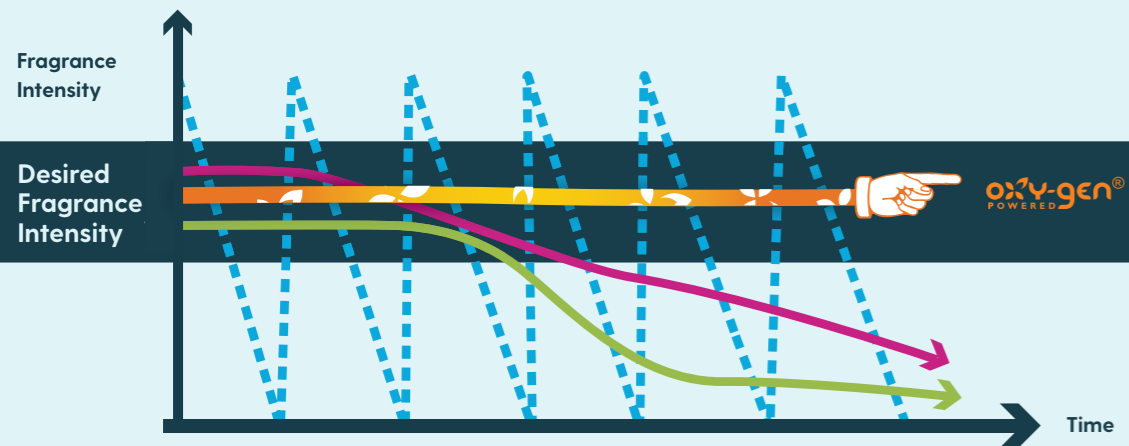

Unlike other systems that only mask odours, Oxy-Gen Powered® cartridges eliminate odours and release fragrance effectively and continuously.

Safe and sustainable

With no added solvents, alcohols, CFCs, VOCs or propellants, our Oxy-Gen Powered® cartridges contain 100% pure fragrance oil and are a safe choice for any facility.

Carbon footprint approved, and 100% recyclable cartridges; choose Oxy-Gen Powered® for cleaner air and a cleaner earth.

Cartridges are compliant with:

- Aerosols
15-30 minutes between sprays
- Gels/Wicks
- Gravity/Passive Systems
- Oxy-Gen Powered®
Consistent Continuous Fragrancing

World's first Oxy-Gen Powered® technology

Oxy-Gen Powered® is the only technology that harnesses the power of pure oxygen to guarantee the delivery of fragrance into the air continuously, consistently and accurately for the entire duration of the cartridge life.

This innovative system is based on fuel cell technology that is used in the pharmaceutical industry to deliver drugs to human beings and animals.

Oxy-Gen Powered® technology is simple, reliable and cost-effective.

Embark on a **oxy-gen**® cosmic journey:

Experience the revolutionary Oxy-Gen Powered® system, harnessing fuel cell technology pioneered in space exploration and now optimising pharmaceutical precision in drug delivery.

NASA Mission

The historic 1965 launch of Gemini V; the first spacecraft to utilise fuel cells as its:

- main source of power
- water production
- crew support

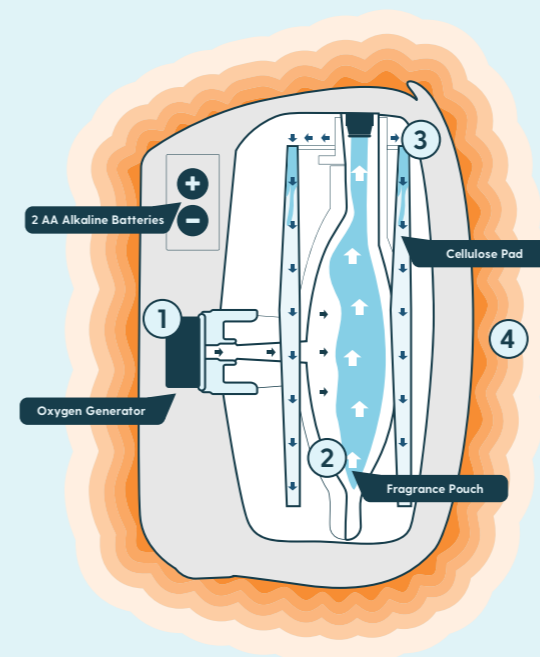

Fuel Cell Technology

From space exploration to pharmaceutical advancement, fuel cell technology powers precise drug delivery to both humans and animals, ensuring optimal efficacy and safety.

Unveiling Oxy-Gen Powered®

Our Oxy-Gen Powered® system uses the same patented fuel cell technology, redeveloped and protected, for only our air fragrance systems - guaranteeing continuous fragrance release throughout the cartridges lifespan.

Technology at a glance

- The oxygen generator continuously releases a precise dose of oxygen.
- The oxygen squeezes the fragrance pouch, displacing the fragrance.
- A continuous measured dose of fragrance is delivered onto the cellulose pad.
- Pure fresh fragrance is released into the room.

Say goodbye to malodors and embrace a world of uninterrupted fragrance perfection.

Available finishes:

The VIVA!e air fragrance system fits easily into a maintenance schedule, with each refill lasting 60 days. Simple to install and refill.

Consistent fragrance levels guaranteed

VIVA!e is designed and engineered to deliver consistent and continuous levels of fragrance and odour control for the full life of each refill.

Unique Oxy-Gen Powered® technology delivers precise doses of intense scent with no variation on delivery or drying out. Low VOCs mean it is ideal for green buildings and LEED certification requirements, whilst its cartridge is 100% recyclable and safe to dispose of in your regular plastic recycling waste.

Available finish:

Made of robust stainless steel with an anti-vandal locking device, SHIELD looks stylish in every setting without compromising security and effectiveness.

Designed for style and protection

The dispenser's smooth contours mean that potential vandals are unable to grip and tamper with the system. SHIELD's unique ventilation design ensures maximum airflow so that fresh fragrance is carried into the room.

Rail Group Standard Approved

SHIELD fragrance system meets the requirements of Rail Group Standard GM/RT2130 Issue 4, EN 45545-2:2013 and BS 6853:1999.

Pro is the perfect odour control system for any establishment as the user can program the dispenser to work for 30, 60 or 90 days.

Safe and eco-friendly

With no added solvents or alcohols, Pro and Supreme cartridges contain 100% pure fragrance oil and are a safe choice for any facility. Since the cartridges are not pressurised containers, they are safe to store and recycle.

Pro dispenser's can be easily mounted on the wall using double-sided tape or screws. The simple push and go format ensures that it is easy to replace cartridges or batteries.

Available finish:

Product code:

White: ESVI02PROW

Supreme's stylish design is perfect for every facility and will elevate the image of your washrooms, offices, reception areas, conference rooms and more.

Secure and easy to maintain

The Supreme dispenser features user friendly, but secure key access for servicing. LED light indicators provide cartridge and battery replacement reminders.

The user can control the level of fragrance intensity for a choice of 30, 60, or 90 days.

Pro Dispenser

The Pro dispenser can be programmed to work for 30 days, 60 days, or 90 days. The cartridge contains 32 ml of pure fragrance oil, approximately 7 times more fragrance oil than a standard metered aerosol can.

Supreme Dispenser's Eco mode

The Supreme dispenser includes a conveniently accessible eco-switch designed to optimise battery efficiency. Upon activation, the dispenser transitions into quiet mode, accompanied by a reduction in light frequency. This not only ensures a discreet operation but also contributes to a substantial extension of battery life.

Equipped with a secure anti-vandal locking system, the Scentinel prioritises both style and security, making it a reliable, long-lasting and elegant solution for fragrance dispersion in any environment.

Designed for style and protection

The Scentinel Dispenser combines durability and elegance, delivering continuous, precise and consistent fragrance doses. Its sleek stainless steel finish enhances any setting with a touch of modern sophistication, effortlessly merging robustness with contemporary aesthetics.

What is Neutra-Lox Malodour Eliminator?

When fragrance molecules are released, they diffuse into the air of the room.

Proprietary Neutra-Lox odour neutraliser molecules eliminate competing malodour molecules, allowing the fresh scent molecules to spread out and fill the surroundings, where they linger in the air.

It eliminates bad odours such as tobacco, kitchen odours, sweat, mildew, animal, body odours, and more.
